

## Questions

**1. Which of the following is not a protocol?**

- (a) HTTP
- (b) SATA
- (c) TCP/IP
- (d) RAID

**Answer: (d) RAID**

**2. What is the processing unit?**

- (a) The brains of the computer
- (b) This is the main circuit board that all other internal components are connected to
- (c) A device that receives, processes, and presents information.

**Answer: (c) A device that receives, processes, and presents information.**

**3. Virtualization refers to: (multiple options)**

- (a) Graphics generated by a computer
- (b) Sound which comes from a set of speakers
- (c) A VPN
- (d) Information generated by a computer

**Answer: (a), (b), (c), (d)**

**4. The instructions that tell the computer what to do and how to do it.**

- (a) Software
- (b) Hardware
- (c) Protocols

**Answer: (a) Software**

**5. What kind of information can be found in a ROM chip**

- (a) Software
- (b) The operating system
- (c) Basic Input/Output System (BIOS)

**Answer: (c) Basic Input/Output System (BIOS)**

**6. What does APU stand for?**

- (a) Applied Processing Unit
- (b) Accelerated Processing Unit
- (c) Augmented Processing Unit

**Answer:** (b) Accelerated Processing Unit

**7. Name the following piece of hardware: (multiple ans)**

- (a) RAM
- (b) CPU
- (c) Motherboard
- (d) Logic board

**Answer:** (c) Motherboard & (d) Logic board

**8. What are the four basic components of a computer?**

- (a) Input devices, output devices, printing, and typing
- (b) Input devices, processing unit, storage, and output devices
- (c) Input devices, CPU, output devices, and RAM
- (d) Input devices, CPU, output devices, and output devices

**Answer:** (b) Input devices, processing unit, storage, and output devices

**9. What does RAM stand for?**

- (a) Retrieve Alternate Memory
- (b) Read Always Memory
- (c) Random Access Memory

**Answer:** (c) Random Access Memory

**10. What does a storage unit provide?**

- (a) A place to show data
- (b) A place to store currently worked on information
- (c) A place to store information

**Answer:** (c) A place to store information

**11. Name two output devices. (multiple answer)**

- (a) Speakers
- (b) Monitor
- (c) Scanner

**Answer:** (a) Speakers & (b) Monitor

**12. What are examples of storage devices?**

- (a) Hard drive, DVD-ROM, flash drive
- (b) Flash drive, RAM, DVD-ROM
- (c) Keyboards, flash drive, printer

**Answer:** (a) Hard drive, DVD-ROM, flash drive

**13. Which of the following are standards? (multiple options)**

- (a) SQL
- (b) SMTP
- (c) JAVA
- (d) ASCII

**Answer:** (a), (b), (c)

**14. What is the World Wide Web (WWW)? (multiple options)**

- (a) A collection of Web Pages
- (b) An information sharing model
- (c) An internet Standard
- (d) A communication Protocol

**Answer: (a), (b), (c)**

**15. What is another name for the Bootstrap Program?**

- (a) Initial Program Load
- (b) BIOS
- (c) Firmware

**Answer: (a) Initial Program Load**

**16. Who developed the Stored Program Concept?**

- (a) Linus Torvads
- (b) Von Neumann
- (c) Tim Burners Lee
- (d) Al Ghazali

**Answer: (b) Von Neumann**

**17. What type of memory is this?**

- (a) Cache
- (b) RAM
- (c) ROM

**Answer: (b) RAM**

**18. DOS stands for**

- (a) Disk Operating System
- (b) Dual Operating System
- (c) Disk Organized System

**Answer:** (a) Disk Operating System

**19. Which of the following companies are famous for manufacturing computer processors? (multiple options)**

- (a) Intel
- (b) Corel
- (c) Sony
- (d) Qualcomm
- (e) AMD

**Answer:** (a), (d), (c)

**20. What is usually stored in RAM?**

- (a) data & Instructions
- (b) Program Instructions

**Answer:** (b) Program Instructions
