

# Contents

Introduction	v
<b>SECTION 1 COMPUTER SYSTEMS</b>	<b>1</b>
<b>1 Data representation</b>	<b>2</b>
1.1 Number systems	2
1.2 Text, sound and images	25
1.3 Data storage and file compression	32
<b>2 Data transmission</b>	<b>45</b>
2.1 Types and methods of data transmission	45
2.2 Methods of error detection	54
2.3 Symmetric and asymmetric encryption	63
<b>3 Hardware</b>	<b>75</b>
3.1 Computer architecture	75
3.2 Input and output devices	88
3.3 Data storage	119
3.4 Network hardware	133
<b>4 Software</b>	<b>147</b>
4.1 Types of software and interrupts	147
4.2 Types of programming language, translators and integrated development environments (IDEs)	165
<b>5 The internet and its uses</b>	<b>180</b>
5.1 The internet and the World Wide Web (WWW)	180
5.2 Digital currency	186
5.3 Cyber security	189
<b>6 Automated and emerging technologies</b>	<b>217</b>
6.1 Automated systems	217
6.2 Robotics	230
6.3 Artificial intelligence (AI)	241

<b>SECTION 2 ALGORITHMS, PROGRAMMING AND LOGIC</b>	<b>257</b>
<b>7 Algorithm design and problem solving</b>	<b>258</b>
<b>7.1</b> The program development life cycle	258
<b>7.2</b> Computer systems, sub-systems and decomposition	260
<b>7.3</b> Explaining the purpose of an algorithm	271
<b>7.4</b> Standard methods of solution	272
<b>7.5</b> Validation and verification	276
<b>7.6</b> Test data	281
<b>7.7</b> Trace tables to document dry runs of algorithms	282
<b>7.8</b> Identifying errors in algorithms	285
<b>7.9</b> Writing and amending algorithms	288
<b>8 Programming</b>	<b>299</b>
<b>8.1</b> Programming concepts	302
<b>8.2</b> Arrays	329
<b>8.3</b> File handling	333
<b>9 Databases</b>	<b>339</b>
<b>9.1</b> Databases	339
<b>10 Boolean logic</b>	<b>356</b>
<b>10.1</b> Standard logic gate symbols	356
<b>10.2</b> The function of the six logic gates	358
<b>10.3</b> Logic circuits, logic expressions, truth tables and problem statements	360
<b>Index</b>	<b>387</b>
